SUMMARY

Shopify Developer with 4+ years of full-stack experience, specializing in Shopify Plus, Liquid theme development, and custom Shopify apps. Led a year-long migration of a WooCommerce platform serving millions of users to Shopify Plus and built a custom fulfillment app from scratch using Remix, Polaris, and Node.js. Strong background across React, Angular, Node.js, MongoDB, Redis, and WordPress.

SKILLS

Shopify: Liquid templating, Shopify Plus, custom app development, Shopify CLI, Admin APIs, Shopify Functions, Shopify extensions, Polaris

Backend: Node.js, Express.js, MongoDB, MySQL, Redis, BullMQ, REST APIs, Server-Sent Events, Microservices, Third-party integrations (Razorpay, Stripe)

DevOps & Architecture: Git, GitHub Actions (CI/CD), DigitalOcean, Amazon S3, Rush.js, pnpm, Yarn workspaces, Monorepo architecture

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Angular, Angular SSR, Bootstrap, Angular Material, PrimeNG, Figma, Webpack, Micro-frontends

Platforms & CMS: WordPress, WooCommerce, WordPress plugin & theme development, GoHighLevel (GHL), Google Analytics, Google Tag Manager

EXPERIENCE

Shopify Developer — Napstack Solutions, Jalandhar, Punjab

2025 – Present

Bullymake.com migration & custom app development

- Led the end-to-end migration of Bullymake (a WooCommerce platform with millions of subscriptions, orders, and customers) to Shopify Plus, designing the roadmap with international developers and delivering the project over 1 year.
- Redesigned the entire storefront in Liquid using sections and templates, preserving SEO, performance, and conversion integrity throughout the migration.
- Built a custom Shopify fulfillment app from scratch (frontend and backend) using Remix, Polaris, Node.js, Redis, and BullMQ, automating box-code generation based on order line items.
- Implemented multi-worker Node.js order processing with webhook handling and a tag-based approach, achieving zero-downtime automated order and renewal processing.
- Developed Shopify app extensions and custom "my account" features using Shopify Admin APIs and embedded React micro-frontends (webpack) into Liquid templates.

Full-Stack Developer — Napstack Solutions, Jalandhar, Punjab

2023 – 2025

Autowade.com platform — a multi-app course hosting SaaS

- Collaborated across all Autowade applications (autowade.com, console.autowade.com, user sub-domains, and the Node.js API) built on Angular SSR and Node.js.
- Developed core course-hosting features including Adaptive Bitrate (ABR) streaming, S3 chunking with secured video segments, and video.js player integration.
- Built S3-based video upload, processing (YouTube-style transcode with retries), and download systems using Redis queues, BullMQ workers, and MongoDB event handling.
- Integrated third-party systems including Razorpay, Stripe, and email automation, and set up CI/CD with GitHub Actions in a monorepo managed with Rush.js and pnpm.
- Created error tracking and log dashboards built with Angular Material to centralize monitoring.

Frontend Developer — Napstack Solutions, Jalandhar, Punjab

2022 – 2023

- Developed new features and fixed bugs across Bullymake.com, consuming WordPress REST APIs and managing client-facing UI changes for dadesignsf.com.
- Upgraded the Bullymake frontend from Angular 6 to Angular 15 and introduced a monorepo architecture using Rush.js and Yarn workspaces for shared code.
- Built a custom error-tracking dashboard in Angular (similar to Sentry/Datadog) that aggregates WordPress and frontend errors in one place.

Frontend Developer Intern — Napstack Solutions, Jalandhar, Punjab

2021 – 2022

- Learned and applied Angular, Angular Material, Bootstrap, CSS, HTML, JavaScript, TypeScript, and Webpack on live client projects.
- Built the reviews system UI/UX for Bullymake.com and integrated its REST APIs into the Angular frontend.
- Handled periodic theme changes and added small features across company projects.

PROJECTS

Bullymake.com — Subscription boxes for dogs

Full-Stack Developer

- Maintained and scaled the project using a monorepo architecture with remote, cross-time-zone collaboration.
- Developed frontend features using Angular, Angular Material, and Bootstrap; designed responsive UIs in Figma.
- Built a custom Shopify fulfillment app for automated DHL label generation and developed Liquid themes with integrated micro-frontends.

Autowade.com — Course hosting & monetization platform

Full-Stack Developer

- Developed multiple apps and landing pages under the Autowade brand with an event-driven architecture (BullMQ).
- Implemented S3-based video hosting with YouTube-style streaming, serving user-specific content via ABR and secure chunking.
- Played a key role in backend development using MongoDB and shared code across services via monorepo.

Godli.com — Subscription boxes for children

Full-Stack Developer

- Designed, developed, and managed the site end-to-end in WordPress, including subscriptions, UI optimization, custom plugin and theme development.
- Integrated Google Analytics, Tag Manager, and custom event tracking, and embedded React-based micro-frontends.

BlueFusion Partners & FusionPro PM — GHL sites

Developer

- Designed and developed both websites in GoHighLevel, handling all operations end to end, including funnels, workflow automations, design, and development.

EDUCATION

Lovely Professional University, Jalandhar, Punjab

2018 – 2022

Bachelor of Technology in Computer Science and Engineering | Cumulative GPA: 8.0/10
